

Made with chemicals safer for human health and the environment. Manufactured on farms or in facilities that protect the rights and/or health of workers. Need help?

I recently installed two 100ah Lithium batteries into an insulated battery box I fabricated out of diamond plate aluminum. Concerned that the batteries would not come up to charging temp ...

This is my install of a custom set of battery warmers from Ultra Heat. I had contacted them through email asking about a warming profile for LiFePO4...

If you are trying to use a lifepo4 battery in freezing cold temperatures, battle born just released a 12v heat pad for keeping the batteries warm without melting the case. This pad should ...

Choosing the right heating pad for lithium batteries is essential to maintain performance and extend life in cold environments. The pads below are designed to provide even, controlled ...

All of the lifepo4 batteries I have bought ranging from 12v to 48v had a foam pad on the bottom of the battery to protect it during shipping. The pad comes up the sides an inch or two and ...

One of the most important things about heating cells with heating pads is to do so slowly, so that the thermal mass of the cells can absorb and disperse the heat throughout.

I decided after some research (on here and other places) and before winter gets here to come up with a battery heat pad setup for my new 3x 100ah Lipo4 batteries that are in my aluminum ...

If you are trying to use a lifepo4 battery in freezing cold temperatures, battle born just released a 12v heat pad for keeping the batteries warm without melting the case.

I'm using these 12v silicon heating pads, with two sets of pads wired in parallel to divide the voltage and decrease the output. I used silicone glue from the local home improvement store to ...

I was concerned that the silicone pads would produce too much heat since they're rated for 2 amps. Did running them (2 or 4?) in series keep them from heating up too fast?

The heating pads with integral thermostat are typically fine, even with some insulation on the side opposite the battery. They may cycle a bit more, but that's not a big deal.

Keep your batteries performing optimally in cold weather with the RevoPower Battery Warmer, designed to

provide consistent and efficient heating for lithium ...
