5MW of outdoor cabinets used in tunnels along the Belt and Road Initiative

Will China expand the Belt & Road Initiative in 2025?

Chinese finance and investments into the Belt and Road Initiative countries in 2025 H1 have accelerated significantly. For 2025,a further expansion of BRI investments and construction contracts seems possibledespite (or because of) global economic headwinds driven by US-led trade impositions.

Does the Belt & Road Initiative affect global climate?

The Belt and Road Initiative (BRI),initially proposed by China in Fall 2013,involves large-scale development of infrastructure,including energy infrastructure,in Asia,Europe,and Africa,and thus has the potential to affect global climate.

Can China help accelerate energy transitions in Belt & Road countries?

Another way Chinese financiers and companies could help accelerate energy transitions in Belt and Road countries is by aiding the early retirement of coal power plantsthey have been involved in building over the last decade. One way to do that is by conditional refinancing of such projects.

Will China's economy influence the second decade of the Belt & Road?

Yunnan Chen from the Overseas Development Institute,a think-tank headquartered in London,notes that the first decade of energy infrastructure investment on the Belt and Road was shaped by the overcapacity and spillovers from China's domestic economy. So too will the second decade of the BRI feel the influence of that economy,says Chen.
