

Solar panels stand in an installation beside a lake at a hybrid fishery and solar-photovoltaic-power station in Wuhu, Anhui province, China, on December 15, 2024.

Concentrating solar power (CSP) projects in China are listed below alphabetical by project name. You can browse a project profile by clicking on the project name.

What follows are the top 10 solar power plants that are actually operational and verifiably producing power as of 2025. No speculative or half-built megaprojects and planned expansions.

As a result, solar power plants have emerged as a viable alternative to fossil fuels, allowing for a reduction in greenhouse gas emissions. Also of note is the geographic diversity across ...

A large part of the solar power capacity installed in China is in the form of large PV power plants in the west of the country, an area much less populated than the eastern part but with better solar ...

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic solar capacity to reach its climate target....

The project combines solar energy production with agriculture, using the space beneath the panels to grow grass for livestock, supporting the local economy.

OverviewSolar photovoltaicsHistorySolar resourcesConcentrated solar powerSolar water heatingEffects on the global solar power industryGovernment incentivesAs of at least 2024, China has one third of the world's installed solar panel capacity and is the largest domestic market for solar panels. A large part of the solar power capacity installed in China is in the form of large PV power plants in the west of the country, an area much less populated than the eastern part but with better solar resources and available land.

Myanmar has 190 MW of utility-scale solar power currently in operation, with 5 GW of prospective solar and wind power in development; over 90% of this prospective power is in the form of announced ...

In 2024 alone, China installed 360 gigawatts (GW) of wind and solar capacity. That's more than half of global additions that year, and it brings total installed capacity to 1.4 terawatts (TW) - ...

Listed below are the five largest active solar PV power plants by capacity in China, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to ...
