

Accounting entries for solar power generation for own use

Do solar power plants need accounting?

The IRENA's report for the year showed that solar and wind were again at the helm of new renewable capacity. Even as the sector celebrates its growth, the right accounting approach is imperative for solar power plants. Proprietors and operators of solar power plants should consider several in the accounting of their facilities.

How to invest in a solar power plant?

Investment in a solar power plant is in most cases characterized by fixed assets that carry most of the cost. The most notable pieces of equipment, in this instance, include solar PV modules, batteries, meters, and energy storage systems (ESS). But also remember to consider the not-so-obvious power generating equipment.

Can IFRS 9 be applied to renewable power purchase agreements?

Effective from 1 January 2026 Companies face challenges in applying IFRS 9 Financial Instruments to contracts referencing nature-dependent electricity - sometimes referred to as renewable power purchase agreements (PPAs). The International Accounting Standards Board (IASB) has now amended IFRS 9 to address these challenges.

Does solar power generating equipment need to be depreciated?

For equipment that doesn't last beyond one year, it is placed in the business expense category so there is no need to depreciate it. For the rest of the equipment, an appropriate accounting method should be applied to correct the allocation of costs. Solar power generating equipment is eligible for depreciation.
