

Assembly diagram of photovoltaic flexible rope bracket

The flexible photovoltaic support originates from the roof of suspension structure and glass curtain wall. It is a photovoltaic support system supported by suspension structure.

Flexible bracket is mainly applicable to scenarios such as mountainous projects with large slope (e.g. above 35°), fishery-photovoltaic and agricultural-photovoltaic projects ...

In view of the uniqueness of its structure, the flexible bracket has a wide range of application scenarios, similar to sewage treatment plants, agricultural light complementarity, fishing light complementarity, ...

As an important part of photovoltaic power generation system, flexible photovoltaic bracket has been paid wide attention in recent years because of its adaptability and high efficiency in ...

A tracking type flexible photovoltaic bracket is provided, including photovoltaic assemblies, pillars, a driving member, direction-changing mechanisms, and two pulling ropes. Each ...

The utility model relates to the technical field of photovoltaic brackets, in particular to a flexible photovoltaic bracket.

A photovoltaic bracket comprises a support component, wherein the support component is composed of at least two support structures; the rope assembly consists of three ropes which ...

The present invention relates to the technical field related to flexible brackets, and in particular to an assembled photovoltaic flexible bracket and a use method thereof.

Definition: Flexible photovoltaic brackets use prestressed flexible cable structures (such as prestressed steel strands) as the main force-bearing components to form a large-span photovoltaic ...

A flexible photovoltaic bracket includes a fixing structure, a rope structure and a support frame. The rope structure includes a first assembly rope, a second assembly rope, a first stabilizing rope and a ...
