

From rugged outdoor applications to critical emergency backup systems, Austria's portable energy solutions continue setting new benchmarks in sustainable power technology.

Austria quadruples subsidies as demand for solar and battery energy storage systems soars, adding 218 MW PV and 200 MWh storage capacity.

Located in F&#252;rstenfeld, in the country's southeast, the facility has 24 MWh in capacity and a maximum output of 12 MW. The successful endeavor is part of the company's strategy to ...

A new energy storage study from PV Austria, conducted with Austrian Power Grid (APG), TU Graz, and d-fine, reveals how critical battery energy storage is for Austria to meet its...

ADS-TEC Energy has marked its first year in Austria with active and upcoming battery storage projects supporting grid stability and renewable integration.

The local authority in Pongau is the first to use a Liebherr energy storage system to power a construction site instead of a diesel generator. This saves around 2,000 litres of diesel per ...

In Austria, only pumped-storage hydro power plants have a long tradition as a means of storing energy. But additional storage capacity using other technologies such as battery storage will be required for ...

ADS-TEC Energy's Austrian subsidiary secured multiple 2025 contracts with utilities and industrial operators to install grid-connected battery energy storage systems. A Carinthia pilot now ...

We provide our customers with state-of-the-art battery technology solutions for a wide range of mobile and stationary applications. Our patented immersion cooling architecture enables unsurpassed ...

We are thrilled to announce the launch of our 1MWh energy storage system in Austria. This project, now live, uses 192 Hicorenergy batteries paired with Victron inverters to create a powerful, sustainable ...
