

Will solar prices rise 9% in Q4 2025?

Subscribe to Electrek on YouTube for exclusive videos and subscribe to the podcast. Solar and storage prices will rise 9% in Q4 2025 as China cuts production and ends export tax rebates, Wood Mackenzie says.

How much will solar cost in 2024 & 2025?

Solar module prices reached 'historic lows' of US\$0.07-0.09/W in 2024 and early 2025, according to Wood Mackenzie. Image: LONGi. New Chinese government policies and supply-side production cuts will drive a significant increase in solar and storage component costs from the fourth quarter of this year onwards.

How much does a solar module cost in China?

Price competition among Chinese manufacturers saw solar module prices hit lows of USD 0.07-0.09 (EUR 0.06-0.08) per watt in 2024 and early 2025.

Will VAT rebate cancellation increase solar prices in Q4?

"Module manufacturers have already warned international customers to expect approximately 9% price increases in Q4 as a result of the VAT rebate cancellation," said Yana Hryshko, senior research analyst and head of Global Solar Supply Chain at Wood Mackenzie.

Energy data and analytics firm Wood Mackenzie believes that solar PV module prices will climb by about 9% in Q4 2025. The rise is driven by polysilicon consolid

Solar module prices are set to jump by 9% in the fourth quarter of 2025 and rise through 2026, driven by a convergence of three factors, including Chinese government policy changes, Wood ...

In a new weekly update for [pv magazine](#), OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV industry.

Inside Clean Energy Solar Panel Prices Are Low Again. Here's Who's Winning and Losing Whether for utility-scale or rooftop projects, photovoltaic panels are cheaper than ever.

Chinese government policies and supply-side production cuts will drive a significant increase in solar and storage component costs.

Solar and storage developers face a sharp increase in equipment procurement costs from Q4 2025 onwards due to Chinese government policy changes and supply-side production cuts, ...

Solar module prices projects to jump 9% in Q4 2025 as China reduces VAT rebates. Learn procurement strategies, technology alternatives (HPBC/ABC), and cost-saving tactics.

One of the most transformative changes in technology over the last few decades has been the massive drop in the cost of clean energy. Solar photovoltaic costs have fallen by 90% in the ...

Solar and storage prices will rise 9% in Q4 2025 as China cuts production and ends export tax rebates, Wood Mackenzie says.

China has confirmed that it will eliminate value-added tax (VAT) rebates on exports of photovoltaic products from 1 April 2026, a move set to mark a turning point for global solar prices. ...
