

BG EXERON X-BESS is a system for electric energy storage in batteries, developed based on patented technology by International Power Supply AD (IPS). The production will be ...

The innovative Bulgarian project for the production of energy storage batteries BG EXERON X-BESS has been granted strategic status under the European Commission's Net Zero ...

IPS has officially opened its new battery energy storage system (BESS) manufacturing facility near Sofia, Bulgaria - a site recognized by the European Commission as a Strategic Project...

Bulgaria's Ministry of Energy has approved EUR588 million in funding for 82 standalone battery energy storage projects, totaling nearly 9.7GWh of usable capacity. The final decision, ...

In Bulgaria, the energy storage industry is influenced by several key considerations. Regulatory frameworks are evolving, with the government increasingly supportive of renewable energy and ...

Summary: Bulgaria is emerging as a key player in energy storage innovation, particularly in supercapacitor production. This article explores the country's technological advancements, market ...

On June 2, it was reported that International Power Supply (IPS) is set to begin operations at its new battery energy storage systems (BESS) manufacturing facility near Sofia, Bulgaria.

The first battery energy storage gigafactory in the country is part of the Hemus high-tech industrial park. The facility will manufacture X-BESS modular systems of 8.2 MWh.

International Power Supply (IPS) has officially launched Factory X1, marking the opening of Bulgaria's first battery energy storage system (BESS) gigafactory.

storage is hindering Bulgaria in the development of an energy storage market. Furthermore, Bulgaria's energy legislation and grid codes have been historically written with thermal plants in mind, ...
