

This project enhances energy security and reliability, storing renewable energy to power one-third of Canberra during peak demand. Learn about its impact, development, and community benefits.

The Australian Capital Territory Government and global energy storage firm Eku Energy have begun construction on the Williamsdale Battery Energy Storage System

Additional 5000 batteries have been installed through the ACT Government's Next Generation Energy Storage Program. As of March 2025, there are over 10,600 Zero Emission Vehicles registered in the ...

The Big Canberra Battery will play a crucial role in managing peak electricity use demand and in supporting the ACT's transition to a more sustainable energy future.

The ACT Battery project in Australia will enhance the quality of supply in the city of Canberra and accelerate the country's energy transition by enabling greater introduction of ...

The 250-megawatt (MW), 500 megawatt-hour (MWh) battery energy storage system (BESS) will store enough renewable energy to power one-third of Canberra for two hours during peak demand periods, ...

The ACT Government has reached a major milestone in its work to future-proof Canberra's energy supply. The development application has been approved to deliver Stream 1 of ...

The way has been cleared for construction to begin on a 250 MW / 500 MWh battery energy storage system that will help "future proof" the Australian Capital Territory's energy supply by ...

The large-scale battery storage system will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability. Enough energy to power one-third of Canberra for two ...

The Big Canberra Battery will give the community energy security by keeping their power running, while helping reduce emissions. The large-scale battery will deliver at least 250 megawatts ...
