

Rich experience has been gained by the company, such as large and medium-sized ground-mounted projects, industrial and commercial distributed rooftop solar system, Agri-PV/ PV+ Desertification ...

The 1MW PV grid-tied system consists of two 500kW inverters which output 270V three-phase AC, then by boosting the voltage of which to 10kV or 35kV to feed to the grid.

CHINT residential solar solution helps you to embrace a sustainable, cost effective energy life. Our solar systems are designed to power your entire home effeciently, making it a smart investment for long ...

Our Newest 3D Interactive Experience is Here! Get a detailed look at the newest addition to our growing family of 3-phase string inverters! Market leading solutions from a tough company you can count on. ...

CHINT Residential Solar Power Solution utilizes idle rooftops and open spaces to create distributed PV systems, offering reliable, high-efficiency energy generation that can be used for self-sufficiency or ...

Through our technologies and expertise, we are making deeper integration of solar power into various scenarios. The best way to boost economic benefits out of limited land availability.

This live webinar covers important product specification, system design and product installation topics. Our NABCEP certified applications and service engineers will help you get the most out of our ...

Top five!Chint power has won the 365 global photovoltaic ranking list!

As a trusted equipment provider, Chint Power Systems designs, manufactures, and supplies high-reliability, high-efficiency inverters with superior temperature protection, along with advanced energy ...

This includes smart manufacturing of core photovoltaic components, power station development, EPC construction, storage and electrical system support, and new energy asset operation and ...
