

Uruguay achieved 98% renewable electricity in just 15 years--without subsidies or aid. Discover the strategy behind it, and how EcoSync is applying this model globally.

While many nations pledge to embrace renewable energy, Uruguay stands out as a beacon of success, having achieved an impressive 98% renewable electricity generation.

Uruguay's electricity matrix reached 92% renewables even in the year with the lowest hydro contribution on record. The robustness of the National Interconnected System (SIN) has been increased through ...

In Montevideo's bustling port, trucks are beginning to run on cleaner power. Across the country, engineers are testing Uruguay's first autonomous charging station for heavy vehicles and ...

Energy rationing had to be implemented, and electricity bills continued to rise. "It was difficult for us to cope," Ram&#243;n M&#233;ndez Galain, a professor at the University of the Republic in ...

Once reliant on exorbitantly priced fossil fuel imports for nearly half of its energy needs, Uruguay has gone from suffering frequent blackouts and power cuts to relative energy sovereignty ...

Uruguay did what most nations still call impossible: it built a power grid that runs almost entirely on renewables--at half the cost of fossil fuels. The physicist who led that transformation says...

While many nations pledge to embrace renewable energy, ...

Held up as a case study for successfully transitioning away from fossil fuels, Uruguay now generates up to 98% of its electricity from renewable energy. The country offers lessons in ...

Uruguay's clean energy journey is not just about electricity; it's about vision, resilience, and human determination. In just over a decade, the country rewrote its energy future, moving from vulnerability ...

Physicist Ram&#243;n M&#233;ndez was sitting in his university office in Montevideo when he received the unexpected phone call that would change his life... and the way Uruguay produces ...
