

Colombian company Erco Energy has inaugurated the La Martina project, featuring a 16.7 MWp solar plant and a 6.9 MWh battery system in Paratebueno. Source: PV Magazine LATAM.

That's where the Bogotá's Pumped Storage Power Station comes in. This \$800 million project, approved in Q2 2023, aims to solve Colombia's renewable energy puzzle through an ancient concept with a ...

Celsia has deployed the battery energy storage system (BESS) at its 9.9MW Celsia Solar Palmira 2 farm in Valle del Cauca to help increase the generation capacity of the plant, shifting ...

Colombia's first grid-scale battery energy storage system (BESS) came online in 2023 near Medellín - a 20MW/40MWh behemoth that's essentially a giant Tesla Powerwall for the national ...

A 290MW coal plant in Colombia will be entirely converted into a renewable energy site using a combination of solar PV and battery storage.

Colombia's national grid is getting stronger in 2025 with 17 new energy projects, mostly solar, boosting capacity and resilience. Discover how distributed generation, solar power, and ...

The new mechanism introduces technology-specific products, extends commissioning deadlines to 2035, and formally recognises energy storage as a core asset for power system ...

As Colombia aims to generate 20% of its electricity from renewables by 2030, Medellín's lithium battery initiative emerges as a game-changer. This project doesn't just store energy--it reshapes how cities ...

Colombian power generator Emgesa S.A. E.S.P., an Enel Group company, has begun operating the country's first battery energy storage system in central Cundinamarca department, ...

Colombia's energy transition is entering a new and decisive stage. While the country continues to expand its renewable energy portfolio, especially in solar and wind, its ability to...
