

Parque Solar Villavieja will rise in Huila with 200 MW of power. Discover how this massive solar project is set to transform Colombia's energy map by 2027.

The report, titled Investment Opportunities for Utility-Scale Solar and Wind Areas: Colombia Zoning Assessment, provides a comprehensive spatial and techno-economic evaluation of ...

After multiple EUPP meetings, the Mining and Energy Planning Unit (UPME) released a request for proposal for the design, construction, operation, and maintenance of Colombia's first utility scale ...

Colombia has seen a significant increase in utility-scale PV capacity in 2023, with new projects totaling 207 MW, contributing to a cumulative solar capacity of 486 MW by the end of the year.

Cost competitiveness of solar PV, with utility-scale projects now under \$0.03/kWh, making solar economically attractive. Government and international funding programs aimed at rural ...

The output of the analysis is a map identifying zones with a high degree of feasibility (or opportunity) for hosting utility-scale solar PV or onshore wind power plants, where each zone has an identifier, the ...

By harnessing the country's vast solar potential, Colombia can provide power to rural communities, reduce its reliance on a single form of electricity generation, and lower carbon ...

The WRI workshop enabled diverse stakeholders in Colombia to identify, analyze and propose systematic solutions to the barriers limiting the renewable energy investment pipeline, with ...

Colombia has invested over \$9 billion in renewable energy, making it a Latin American leader in solar power and sustainable innovation. Discover how this investment boosts jobs, drives ...

The Ser Colombia renewable energy association said that Colombia connected 33 utility-scale solar projects to the grid in 2024, totaling 1,410 MW.
