

Construction Scheme for Grid-Connected Power Storage Units in Spain

The European Commission has approved, under EU State aid rules, a EUR350 million Spanish scheme, made available through the Recovery and Resilience Facility ("RRF"), to support the construction and ...

Iberdrola España will install six Battery Energy Storage Systems (BESS) with a combined capacity of 150 MW. This is an innovative solution for the storage and integration of renewable ...

Some 35 battery sites with a total scale of 690.2 MW/2.82 GWh will receive EUR150 million under the program. A further 10 thermal storage sites will receive EUR6.48 million and add 88.35 ...

The scheme aims to deploy between 2.5 and 3.5 gigawatts (GW) of new storage capacity, enhancing the flexibility and resilience of the national power system while enabling deeper integration ...

Spain is processing 462 energy storage projects totaling 7.6 GW. See the hybrid vs standalone split, regional hotspots, and technical implications for delivery and O& M.

The European Commission has approved, under EU State aid rules, a EUR350 million Spanish scheme, made available through the Recovery and Resilience Facility ("RRF"), to support ...

Spain's Royal Decree 917/2025, effective Nov. 16, 2025, reorganizes grid-access priorities by recognizing storage as a flexibility resource, grants renewables top dispatch rights, ...

Spain's EUR700 million program aims to boost battery storage capacity by adding 2.5 to 3.5 gigawatts, enhancing energy stability and supporting renewable integration. The initiative supports ...

Spain has chosen the 143 energy storage projects that will receive capex support from an EU-backed scheme, totalling nearly 9GWh of capacity.

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities and stand ...
