

# Cost of exchanging server rack space among the five Central Asian countries

How is the data center server rack market segmented?

The data center server rack market is segmented based on data center size into small and medium data centers and large data centers. Small and medium data centers, typically characterized by their limited capacity and localized focus, are increasingly adopting advanced server racks to enhance their operational efficiency and scalability.

Who makes data center server racks?

One of the leading companies in the data center server rack market is Schneider Electric, known for its comprehensive range of data center solutions, including server racks, cooling systems, and power management products.

What is the data center server rack market size in 2023?

Europe is another significant market for data center server racks, with a market size of around \$1.2 billion in 2023. The region is characterized by stringent data protection regulations, such as the General Data Protection Regulation (GDPR), which drive the demand for secure and compliant data center solutions.

What drives the server rack market?

The rise in data center colocation services is also a significant driver for the server rack market. Colocation services allow businesses to rent space for their servers and other computing hardware in third-party data centers.
