

# Dean of Energy Storage and New Energy Research Institute

The aim is for next generation storage solutions to provide safe, sustainable energy storage for all uses from personal, off-the-grid, to society-wide, grid-scale storage.

ESRA's primary aim is to push the boundaries of energy storage science to drive technological innovation and strengthen U.S. economic competitiveness.

He is a Laboratory Fellow and currently the director of the Energy Storage Materials Initiative, a multi-million-dollar and multi-year project at Pacific Northwest National Laboratory (PNNL) to ...

Their state-of-the-art capabilities in energy storage technology discovery, modeling and simulation, and materials synthesis and characterization complement those of Argonne. Together, ...

The Energy Institute (EI) is the chartered professional membership body for people who work across the world of energy. Our purpose is to accelerate a just global energy transition to net zero.

Our goal is to change how the world uses and stores energy to benefit society and the environment. Access to clean, resilient energy directly impacts quality of life. Ability to store energy and release it ...

Argonne will lead the Energy Storage Research Alliance (ESRA) in partnership with Berkeley Lab and Pacific Northwest National Laboratory. ESRA focuses on transformative battery ...

Based at Bar-Ilan but to be run in conjunction with the Technion-Israel Institute of Technology in the northern city of Haifa, the body will oversee the development, training, and...

CEI researchers are innovating in software and hardware to integrate advances in solar energy and electrical energy storage with systems and the grid. CEI researchers are exploring the fundamental ...

Prof. Shirley Meng of the Pritzker School of Molecular Engineering will serve as the director of the Energy Storage Research Alliance, a new DOE national hub focused on the nation's ...
