

Under this agreement, Hithium will supply Solarpro with systems for projects in Eastern European countries, including but not limited to Bulgaria, Hungary, Romania, and North Macedonia.

A 100MW/200MWh BESS project in Estonia has been inaugurated by Baltic Storage Platform (BSP), a joint venture (JV) between Baltic developer Evecon, French independent power producer (IPP) ...

Sofia-based Sunotec signed an agreement with oil and gas major Shell on the development of battery energy storage systems in Central Eastern Europe. Sunotec is developing ...

Located in Razlog, Bulgaria, this 55 MWh system, developed in collaboration with Solarpro, marks a significant step forward in the transition to cleaner and more sustainable energy ...

According to our Mission Solar 2040 study, EU-27 BESS capacity must reach 780 GWh by 2030 to fully support the transition. Europe's 2025 growth hinges on the large-scale utility battery ...

From early installations to advanced storage systems: discover how Enel is driving innovation in the BESS sector and sustainable energy storage.

R.Power's European growth strategy centres on a significant pipeline of advanced, grid-secure battery energy storage (BESS) projects, both standalone and hybrid with solar PV. With over ...

Residential solar and storage formed the backbone of BESS expansion during the energy crisis, and as retail energy prices declined and crisis-response incentive programmes waned, so did ...

Stationary battery manufacturer Hithium has successfully deployed the largest battery energy storage system (BESS) project in Eastern Europe to date, with a capacity of 55 MWh.

The rapid expansion of renewable energy across Eastern Europe has created a surge in demand for Battery Energy Storage Systems (BESS).
