

Are EVs safe in the UK?

All new EVs in the UK include advanced driver-assistance systems (ADAS) as standard. The European New Car Assessment Programme (Euro NCAP) remains the benchmark for safety scoring. Nearly every EV sold in Britain in 2025 holds a five-star rating. EV-specific crash structures and battery enclosures contribute to extremely high survival rates.

Are electric cars safe?

Modern electric cars combine cutting-edge crash protection, intelligent electronics, and near-perfect stability. Fire fears belong to the early years of EV adoption; in today's UK fleet, evidence shows electric vehicles are among the safest machines on the road. Are electric cars more likely to catch fire? No.

Are Londoners able to charge electric vehicles at home?

30% of the UK's public electric vehicle charging points are hosted in London, yet over 50% of Londoners can't charge at home. 51% of private-hire journeys in central London are now electric, up from just 20% in 2021 - due to city-wide incentives.

How many EVs are there in London?

As the UK's leader in EV uptake, London is home to 193,000 plug-in cars and vans, with that number expected to rise to 1.4 million by 2030. 2 While 90% of EV users prefer the cost savings and convenience of home charging, 61% of Londoners do not have access to off-street parking-- creating a major barrier to EV uptake in the capital. 3,4
