

A new solar plant in Siguirini will provide reliable electricity to hundreds of households, benefiting nearly 72,000 people in rural Guinea.

PV array in Guinea? The solar energy facility will be the first grid-connected solar photovoltaic (PV) array in Guinea. The project is being developed by InfraCo Africa with the support of Aldwych Africa ...

Guinea plans to build the country's first solar power plants to increase its electricity production by 15% and cut its reliance on West African neighbors.

The 40-MW Koumaguéli solar project in Guinea has taken a step forward with the signing of a 25-year power purchase agreement (PPA) with Electricité de Guinée (EDG). The ...

Guinea's first grid-connected solar project signs PPA The independent power producer (IPP) project will be the first grid-connected photovoltaic (PV) array in Guinea.

This is a major energy milestone that is likely to lead to the construction of the country's first solar-power plant. This achievement offers important lessons for energy sectors across West Africa.

The Koumaguéli Solar project will be Guinea's first grid-connected solar photovoltaic plant. The project is designed to complement power generation at the nearby 75MW Garafiri ...

The 40MWac Koumaguéli Solar project will be Guinea's first grid-connected solar photovoltaic plant and is designed to complement power generation at the nearby 75 MW Garafiri hydroelectric plant.

The Koumaguéli Solar PV project, due to be Guinea's first grid-connect PV plant, will add power to the country's national grid, which has a current capacity of 566MW. The plant, located ...

The Koumaguéli Solar Power Station is a 40 MW (54,000 hp) solar power plant under development in Guinea. When completed, it is expected to be the largest grid-connected, privately funded solar power plant in the country.
