

Germany produces new solar power generation

Far from being a sun-drenched country, Germany boasts one of the world's highest solar power outputs. The country triggered the large-scale launch of the technology with guaranteed feed-in tariffs in the ...

Germany made a notable shift toward renewable energy sources last year, according to a report from the Federal Network Agency released on Friday.

Germany produced 18% of its electricity through solar power in 2025, up from 14% in 2024, a significant leap that meant solar overtook both coal and methane gas in the country's...

OverviewHistoryGovernmental policiesStatisticsCompaniesSee alsoExternal linksDuring the Reagan administration in the United States, oil prices decreased and the US removed most of its policies that supported its solar industry. Government subsidies were higher in Germany (as well as Japan), which prompted the solar industry supply chain to begin moving from the US to those countries. Germany was one of the first countries to deploy grid-scale PV power. In 2004, Germany was th...

In Germany, net public electricity generation from renewable energy sources reached a record share of 62.7 percent in 2024. Solar power generation reached a new record of 72.2 terawatt hours in 2024, ...

Wind power took first place as the strongest net electricity producer, followed by photovoltaics, which increased its production by 21 percent in 2025 and overtook lignite for the first time.

Renewable power accounted for 64.1% of Germany's domestic electricity production in the third quarter of 2025, rising from 63.5% in the same period of 2024.

Solar farms are set for a record stretch of power sector dominance in Germany after becoming the single largest generation source in the country at the earliest point of the year ever.

Germany has accelerated its renewables deployment, with solar growing at a record pace. Wind, though currently lagging, is expected to gain momentum in the future. From January to ...

Since 2004 solar power in Germany has been growing considerably due to the country's feed-in tariffs for renewable energy, which were introduced by the German Renewable Energy Sources Act, and ...

Saturday, January 25, 2025: The Market Master Data Register (MaStR) officially announced recorded 100 gigawatts (GW) of installed photovoltaic power generators. Bottom line, the ...
