

What are Greece's energy storage projects?

The projects are: Project Dokos in Rodopi, with a license of 8.875 MW for two hours, offering an initial installed usable capacity of 25.065 MWh. Greece has cancelled its third large-scale energy storage auction, after a lack of understanding over its rules on power capacity limits.

Does Greece have a battery storage subsidy program?

Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of a battery storage subsidy program launched in 2023, with the country now turning its focus towards a new 4.7 GW unsubsidized BESS scheme.

Does Greece have a zero-subsidy battery system?

The much-awaited ministerial decree for zero-subsidy standalone battery systems has been published in Greece. So far, Greece has provided support to 900 MW of standalone storage projects under three previous auctions.

Why did Greece cancel a large-scale energy storage auction?

The energy regulator in Greece has cancelled the country's third large-scale energy storage procurement auction due to confusion over limits on how much power capacity could be bid in per participant, with a view to relaunching the scheme. The Regulatory Authority for Energy, Waste, and Water (RAAEY) announced the decision last week (13 December).

The updated target for a renewable energy source (RES) share of ~80% in the electricity sector, set in the National Energy and Climate Plan (NECP) that is currently being revised, cannot be met without ...

Greece's Regulatory Authority for Energy, Waste, and Water (RAAEY) has published the results of the country's third auction for standalone battery energy storage system. The 200 MW ...
