

On December 28, the world's first 30 MW-class pure hydrogen gas turbine supporting Shenzhen Energy's Otag Banner 505 MW wind and solar power hydrogen integration green ammonia project ...

A strong growth in solar power is projected to drive the expansion of China's renewable energy generation capacity in 2026, even as average wind power utilization hours decrease slightly ...

Green Giant Solar PV Project is a 1,000MW solar PV power project. It is planned in Democratic Republic of the Congo. According to GlobalData, who tracks and profiles over 170,000 power plants ...

Expanding clean energy across North America through utility-scale wind, solar, and storage, distributed energy resources, and green fuels.

BEIJING (AP) -- Even as China's expansion of solar and wind power raced ahead in 2025, the Asian giant opened many more coal power plants than it had in recent years -- raising concern ...

A Single Phase Hybrid Inverter is a versatile energy solution that integrates both solar energy generation and energy storage capabilities. It allows users to harness solar power, store excess energy in ...

Located off the coast of Fengxian district on the northern shore of Hangzhou Bay, the project forms part of Shanghai's broader strategy to integrate offshore wind and solar energy. It will ...

The solar farm is owned and is being developed by SkyPower Global headquartered in Canada and the Africa Finance Corporation (AFC), domiciled in Nigeria. The solar farm will be built in phases, with ...
