

Can solar panels power a whole house?

Yes, solar panels can power a whole house with the right system size based on your energy needs. Calculate your energy consumption, available roof space, and local sunlight to determine the right size solar system for your home. Grid-tied systems are the most common, but off-grid systems offer complete energy independence.

What is a home solar system?

A home solar system is a powerful, eco-friendly solution designed to harness the sun's abundant energy, converting it into electricity for your household. This innovative system typically consists of solar panels installed on your roof, an inverter to transform the sunlight into usable power, and batteries for energy storage.
