

# How much does it cost to lift photovoltaic panels

How much does it cost to remove and reinstall solar panels?

Make sure the companies you select have a plan to keep your project moving until it is completed. Based on the average cost of projects we've completed in the last year, the estimated cost of removing and reinstalling solar panels is between \$275 and \$300 per solar panel. Amount of time between dennergizing the system and recommissioning it.

Do I need to remove solar panels to install a new roof?

With solar panel warranties of 25 to 30 years and a usable lifespan of well over 30 years, it is possible that you will need to remove the panels to patch a portion of your roof or install an entirely new roof. This blog provides ballpark estimates for what you can expect to pay if you need solar panel removal and installation services.

How does solar panel removal work?

The solar panel removal process is straightforward. Once you've selected a trained professional, they will come to your property to shut down the system and safely de-energize it. Then, they will remove the solar panels from your roof, along with the racking/mounting hardware and any wiring or other system components that are on the roof.

Can solar panels be installed on a roof?

**Pro Tip:** To lessen the likelihood of removing and replacing solar panels, we recommend only installing systems on roofs that are in good condition and in the early part of their life. A good rule of thumb is to not install solar panels on a roof that has a shorter lifespan than the payback period of the solar system.
