

Installation location of the base station backup battery cabinet

The battery cabinet is designed to mount in a standard 19" or 23" wide relay rack or on a wall. Refer to Figure 3 and install the 19" or 23" relay rack mounting angles to the battery cabinet.

The option provides functional access to the equipment circuit breaker via a handle located on the exterior of a cabinet door that is physically connected to the circuit breaker in the cabinet's interior.

Minimum clearances must be maintained between the cabinets and surrounding building parts/cabinet to accommodate the installation and maintenance of the base station.

Typically, the Base Power system is installed near the electric meter, with 3ft of space allocated on the wall for mounting the automatic transfer switch, followed by a 3ft x 3ft ground footprint for the first ...
