

The Eastern Sun project is planned to expand to 600 megawatts by March 2027, with remaining capacity to be added in phases over the next 18 months. The development is expected to ...

While oil and gas still dominate headlines, the country has recently accelerated investments in wind, solar, and energy storage projects to diversify its energy mix and meet growing electricity demands.

Countries in the region are taking steps to scale up their energy storage capacity, with 30 energy storage projects planned to be implemented by 2025. So far, completed ESS projects include ...

Developed by MAPNA Group specialists, the plant is located 45 kilometers from Isfahan and covers an expansive 1,200-hectare area. According to project officials, this first phase of the ...

Look no further than Iran energy storage projects 2025. With a mix of cutting-edge tech and ancient ingenuity, Iran is racing to modernize its grid. But who's reading about this? Engineers, ...

The recent opening of Iran's largest solar power plant, Aftab Sharq, in central Isfahan province, marks a significant milestone in the country's pursuit of self-sufficient renewable energy...

Iran's domestic battery production capacity has quietly tripled since 2020. The new Zagros Lithium-Iron-Phosphate cells boast 6,000 cycle durability - perfect for daily solar load-shifting.

Iran's largest solar power plant was officially inaugurated in Kuhpayeh, Isfahan, during an online ceremony attended by President Massoud Pezeshkian and senior officials on Thursday.

This post explores the current state of Iran's new energy market, recent policies, key case studies in solar PV and energy storage, and the promising yet challenging road ahead.

TEHRAN - Iran is negotiating with several Chinese companies to develop solar power plants and battery energy storage systems (BESS) as part of efforts to boost renewable capacity, a ...
