

# Kuala Lumpur 5G base station civil electricity fee charging standard

How to evaluate a 5G energy-optimised network?

To properly examine an energy-optimised network, it is very crucial to select the most suitable EE metric for 5G networks. EE is the ratio of transmitted bits for every joule of energy expended. Therefore, while measuring it, different perspectives need to be considered such as from the network or user's point of view.

What is a kilowatt installation capacity?

Installation capacity above 5,000 kilowatts, 3,000, 6,000, 9,000, 12,000, 15,000. For the purpose of this Part, "installation capacity" means the maximum level of electrical power at which an installation can be used, worked on or operated for a period of electrical power at which the system starts
