

How much money does Laos spend on electricity?

In 2022, electricity exports brought in over 2.3 billion USD in revenue for Laos, while the country had to spend just more than 40 million USD on electricity imports. Laos currently sells electricity to six countries, namely Thailand, China, Myanmar, Vietnam, Cambodia and Singapore.

How many power plants are there in Laos?

According to data from the Ministry of Energy and Mines of Laos, the country currently has 94 power plants, including 81 hydroelectric ones, with a total installed capacity of more than 11,600 MW.

How is energy used in Laos?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Why is Lao PDR hydropower fleet a good investment?

Utilising the existing surplus from Lao PDR hydropower fleet avoids capital expenditure of new renewable energy. Renewable energy represents up to 66% of total project capital expenditures, and the remaining investment is related to domestic manufacturing and installation.

Ultimately, the existing and planned hydropower fleet places Lao PDR in a unique position to rapidly adopt renewable hydrogen and ammonia as a new and dynamic industry geared ...
