

Latest version of wind power generation technical specifications

This part of IEC 61400, which is a Technical Specification, specifies a uniform methodology, defining measurement, testing and assessment procedures of electrical characteristics of wind turbine ...

Here is a list of the technical specifications of some of the latest wind turbine generators from different manufacturers across the globe:

Find Wind Turbines on GlobalSpec by specifications. Wind turbines convert the kinetic energy from wind into mechanical energy. When used with an electrical generator, the rotation of the wind turbine's ...

IEC TS 61400-21-4:2025 specifies a uniform methodology, defining ...

Technical specifications of the turbines are based on the make and model and other information collected. With the release of this public version, we hope researchers and other interested parties ...

This document provides the specifications for the application of UNFC to Wind Energy Resources (Wind Energy Specifications). Section I of the document provides the necessary context and instructions on ...

Remote monitoring: Double row tapered/cylindrical roller bearings ENERCON direct-drive annular generator ENERCON inverter

The majority of commercially available wind power plants use one of the wind turbine-generator (WTG) technologies listed below. The WTG rating is in the range of 1 to 5 MVA.

IEC TS 61400-21-4:2025 specifies a uniform methodology, defining measurement, testing and assessment procedures of electrical characteristics of wind turbine components and subsystems, as ...

Significant distinctions between an onshore wind power plant and an offshore wind power plant are in the grid-connection method and power evacuation (National Grid, 2023).

Customizable template for federal government agencies seeking to install wind turbines.
