

Lebanon can use solar energy to air condition

Our technologies range from solar air conditioning to power-efficient energy storage systems (BESS) to BIPV cladding and roof tiling technologies. Explore and discover more.

The permissible limits for ambient air quality exposure in Phases 1 and 2 (Decision No. 16/1) are presented in the table below (applicable to point and non-point air emission sources): Emissions to ...

In Lebanon, however, individual decisions to turn to solar are now more a response to the economic crisis than a reaction to climate change and air pollution.

The Energie SolarBox is a self-contained thermodynamic solar water-heating system that combines advanced solar technology with the efficiency of a heat pump, all within a sleek, compact design.

Though the solar boom in Lebanon "was never sustainable," as energy expert and consultant Jessica Obeid tells L'Orient Today, it was a boon for many. "It has safeguarded, in a way, ...

In addition to ammonia-based cooling solutions, solar energy in Lebanon is playing a crucial role in revolutionizing air conditioning. Solar energy is a renewable resource that can be ...

In Lebanon, a country known for its hot climate, the demand for efficient air conditioning and renewable energy solutions is critical. This blog explores the environmental impact of Midea air ...

Lebanon faces an enduring energy crisis, characterized by persistent electricity shortages and an overreliance on polluting self-generation methods, particularly in urban areas like ...

This report, using the DREI methodology, sets out the results of modelling to select public instruments to attract private sector investment in Lebanon to meet the 2030 targets envisioned in the NREAP for ...

This initiative aims to encourage the adoption of renewable energy solutions, reduce pollution, and alleviate the electricity supply crisis, thereby contributing to a more sustainable and ...
