

Lithium is in demand as a critical transition mineral due to its role in the production of lithium-ion batteries used in electric vehicles, mobile phones and renewable energy storage systems.

Designed for Zambia's challenging electrical and climatic conditions, our batteries provide fast charging, long cycle life, and stable high power output, making them a reliable alternative to traditional lead ...

You know, Zambia's been dancing around energy solutions for decades. With 40% of its population still off-grid and hydropower proving unreliable during droughts, the country's energy security hangs by a ...

Let's cut to the chase: Zambia's energy sector is buzzing louder than a beehive in mango season. With frequent power shortages and a growing demand for renewable energy solutions, lithium battery ...

The high Herfindahl-Hirschman Index (HHI) indicates a concentrated market, while the impressive Compound Annual Growth Rate (CAGR) of 80.86% from 2020 to 2024 highlights the increasing ...

The global market for Lithium-ion batteries is expanding rapidly. We take a closer look at new value chain solutions that can help meet the growing demand.

SUNVOLT BATTERY is Zambia's first battery factory, offers reliable lead-acid and lithium batteries, delivering clean energy solutions for homes, vehicles, and businesses

As the global demand for lithium-ion batteries grows due to consumer interest in electric cars, Africa hopes to ramp up its copper mining production to jump-start its economy and meet the electric ...

As a new energy science and technology engineer, I feel compelled to address a critical issue that affects the safety and well-being of our communities: the proper use and installation of ...

Lithium-ion batteries (Li-ion) have revolutionized energy storage, offering higher energy density, efficiency, and longer lifespans than other rechargeable batteries.
