

Lomé, the capital of Togo, has launched a groundbreaking energy storage development policy aimed at boosting renewable energy adoption and stabilizing regional power grids.

The inherent simplicity, safety, flexibility, and durability of our underlying battery chemistry and overall system design clearly set us apart from other energy storage offerings.

Google has partnered with Energy Dome for its first long-duration energy storage deal, deploying CO2 battery technology to ensure 24/7 clean power for data centers amid AI-driven demand.

The results indicate that, while the current energy storage subsidy policies positively stimulate photovoltaic energy storage integration projects, they exhibit a limited capacity to cover energy ...

The project's structured as an energy storage-as-service model with 15-year PPAs. Early backers include AfDB and... wait for it... a crypto-mining firm repurposing stranded assets.

As West Africa accelerates its renewable energy transition, the Lome Photovoltaic Energy Storage System Project emerges as a game-changer. This 50MW solar-plus-storage initiative addresses two ...

With Togo aiming to achieve 50% renewable energy penetration by 2030, this 85MW solar-plus-storage initiative isn't just another infrastructure project - it's solving real grid stability issues while creating ...

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and ...
