

Chinese scientists have created an energy generator that harnesses the transpiration of plants to create electricity, which could transform almost all leaves on Earth into a sustainable and...

Researchers have developed tiny leaf-shaped generators that can create electricity from wind or rain, giving a new meaning to the phrase "power plant." The team built two types of collectors ...

Chinese scientists have developed a transpiration energy ...

Flower Power wind turbines, adorned with ethical artwork created by eco-conscious renowned artists, are thought-provoking art installations that spark debate about climate action.

The compilation was titled "The Love Generation - 67 Classic hits from the Flower Power era";

Researchers have developed a living lotus leaf transpiration generator that can create clean energy.

Chinese scientists have developed a transpiration energy generator capable of creating electricity using lotus leaves. The generator could turn nearly all leaves on the planet into a ...

View credits, reviews, tracks and shop for the 1998 CD release of "The Love Generation - 67 Classic Hits From The Flower Power Era"; on Discogs.

Drawing inspiration from nature, Flower Turbines promises effective wind generation minus the noise that's usually a key concern in windfarms. They also pose no threat to birds and other...

Researchers in Italy have developed an energy-harvesting system that can be embedded within plants and creates electricity from raindrops or wind. Under rainy or windy conditions, the ...

Chinese scientists have developed an energy generator that uses plant transpiration to produce electricity. The hydrovoltaic electricity generation method induced by living leaf transpiration...
