

As China prepares to launch the largest microgrid demonstration program in the world, we review progress made by demonstration programs across Europe, Asia, and the Americas as well as ...

Since 2018, the NCU research team has gradually built up an on-campus microgrid demonstration area to conduct advanced research into power dispatching, energy sharing, and ...

Three microgrids are being built, each with increasing capability and complexity, which will function as permanent energy systems at Department of Defense sites (Joint Base Pearl Harbor-Hickam, Fort ...

NLR is collaborating with the San Diego Gas & Electric Co. to model a microgrid in Borrego Springs, California, and evaluate how a microgrid controller with advanced functionality ...

This project will be unique for its use of a real-time connection of experimental resources--a digital-twin system will link real microgrid data from North Carolina to NREL and ...

We have gathered information for the following microgrid demonstration projects from around the world. If you know of other sites and would like them listed here, please contact the site administrators.

This demonstration home by SoCalGas is a first of its kind, using solar, storage, an electrolyzer, and the Generac ARC microgrid controller to convert solar energy to hydrogen.

To achieve our Community Microgrid vision, the Clean Coalition is designing and staging numerous Solar Microgrids at critical community facilities, which will be ready to connect to larger Community ...

GIG is a leader in creating control and optimization solutions and demonstrating these solutions in real-world vehicle-grid and microgrid applications that reveal control, optimization, hardware, and ...
