

Middle East Home solar Energy Storage Project

In this project, GSL ENERGY successfully completed the installation and commissioning of a 160 kWh High-Voltage Energy Storage System (HV ESS) in the Middle East.

This month's news, spanning Saudi Arabia, UAE, Oman, and beyond, reveals a surge in utility-scale BESS deployments, hybrid solar-storage hybrids, and policy-driven investments totaling ...

The Emirati state-owned renewables developer Masdar has begun construction on a giant solar-plus-storage project in Abu Dhabi.

In a significant step toward advancing clean energy, the UAE has launched the world's largest renewable energy project combining solar power with battery storage.

We highlight the rise of standalone projects against hybrid solar-plus-storage systems, emerging government tenders, and key initiatives like the Red Sea Project and the South African ...

We are happy to announce the successful deployment of a 112kWh residential solar energy storage project in the Middle East, utilizing 7 units of our LPUS48V314H Home Mobile LiFePO4 Battery, each ...

Located in Abu Dhabi, the project will feature a 5.2GW (DC) solar photovoltaic (PV) plant, coupled with a 19 gigawatt-hour (GWh) BESS, setting a global benchmark in clean energy innovation.

Masdar and EWEC have begun construction on what they describe as the world's first gigawatt-scale renewable energy project to deliver continuous, round-the-clock power. The ...

Valued at approximately AED232 billion (around US\$5.9 billion), this project will integrate 5.2 gigawatts of solar photovoltaic power with a 19-gigawatt-hour battery energy storage system.

Explore 10 renewable energy projects in the Middle East, showcasing solar, wind, and battery storage advancements set for 2025. Read more here.
