

A strategic lithium refining project has been launched in Morocco, backed by LG Energy Solution and China's Yahua Group, with an investment exceeding 5.5 billion dirhams.

Morocco's commitment to sustainability and environmental stewardship aligns with the goals of the global clean energy transition. By investing in gigafactories for lithium battery production, ...

Morocco's lithium sector, handling 3% of global EV battery materials, supports its goal of 107,000 electric vehicles by 2025. The plant aligns with China's 7.5 million EV production in 2024, ...

Morocco has just achieved a major industrial breakthrough. South Korea's LG Energy Solution and China's Yahua Group officially committed to building a lithium hydroxide refinery in ...

Thanks to its natural resources, advantageous geographical position and strategic partnerships with global players, Morocco aims to become a regional hub for sustainable ...

Morocco is emerging as a key player in the global electric battery industry, exemplified by a strategic partnership between South Korea's LG Energy Solution and China's Yahua, which ...

Morocco is emerging as a new hub for the lithium battery industry, driven by abundant resources, LFP technology, and rapid development of full supply chains.

Morocco will host Africa's first battery gigafactory following a \$5.6 billion investment led by China's Gotion High-Tech. The facility, located in Kenitra, aims to produce 20 gigawatt-hours...

A major industrial milestone has just been reached in Morocco as LG Energy Solution and China's Yahua Group officially greenlight a lithium hydroxide refining plant in the country.

In addition to abundant phosphate reserves, Morocco also possesses metal resources like cobalt and lithium needed for battery production and has cost advantages. Industry estimates ...
