

Let's cut to the chase: In December 2023, Windhoek made history by launching Namibia's first grid-scale energy storage system. This 54MWh project in Erongo Region isn't just a ...

This facility specializes in manufacturing advanced battery storage systems designed to stabilize solar and wind power grids. With over 40% of Namibia's electricity now coming from renewables, reliable ...

E2S Systems is a Namibian based company that distributes mid, large and grid scale Battery Energy Storage Systems (BESS). Our proven technology partner from Europe, Visblue, manufactures next ...

Surplus electricity from RE generation as well as cheaper electricity imports from the Southern African Power Pool (SAPP) can be stored in the BESS. The stored energy could supply customers during ...

Located in Omaburu, Erongo Province, northern Namibia, the project aims to address the demand for power shortages, reduce the impact of unstable photovoltaic power

The Omburu project, located near Omaruru in central Namibia, is designed to store 51 megawatt-hours of electricity for release during peak demand, displacing costly emergency imports ...

Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's dedication to modernising its energy infrastructure, according to a top local official.

As global demand for renewable energy solutions surges, Namibia is emerging as a key player in energy storage battery manufacturing. This article explores how the country leverages its natural resources ...

In Namibia, one of the largest electricity storage systems in southern Africa is currently being built - financed with a grant from KfW. Namibia has great potential for solar and wind energy, but so far it ...

Get reliable, long-duration energy storage in areas where traditional grid access is limited. Combine your on-site power generation with a VRFB energy storage system.
