

New Zealand Auckland 10kW off-grid solar inverter

What is the average solar system in New Zealand?

The 'average' residential solar system in New Zealand is about 5kW of solar generation. Is a 10kW solar system appropriate for your situation? Why not 6kW?

Are solar systems cheaper in New Zealand?

All you need to do is reach out to us. Since the end of 2024, the pricing of solar systems in New Zealand for grid-tied, commercial and off-grid solar has generally decreased. This is the result of lower costs of components from manufacturers and a more competitive market in New Zealand.

Should I get a 10kW Solar System?

It may not be the best idea to do a bit of research, make some assumptions, then go out and request a quote for a 10kW solar system. Instead, speak to a designer who can customise your system based on your actual goals and situation. In fact, you won't pay any more for a carefully designed system that takes into account a whole range of factors.

What is a full off grid Solar System?

Full off grid solar system. A fully off the grid system allows you total independence and no power bill. There are advantages and disadvantages to off grid solar, but if the cost to get connected is the same or more than the cost to go off grid, it makes financial sense.
