

Hitachi Energy has signed an agreement with Nordic Electro Power (NEPower) to provide advanced power conversion technology for Finland's largest battery energy storage system ...

Nala Renewables has started construction of a 50-megawatt/100-megawatt-hour battery energy storage system (BESS) in Kauhava, marking its first project in Finland and a new step in the ...

Two of the Nordic country's biggest battery energy storage projects have been announced just days apart.

Sweden-headquartered BESS developer-operator Ingrid Capacity will build a 70MW/140MWh project in Finland, which it claimed will be the largest in the country. Ingrid is ...

The energy storage facility delivered by Merus Power to Lappeenranta, Finland, has been completed and put into market use on 15 May 2025. The energy storage facility is owned by a ...

Ingrid is developing the battery energy storage system (BESS) project in partnership with investor SEB Nordic Energy portfolio company Locus Energy for a commercial operation date (COD) in 2026. The ...

The Haapajärvi energy storage project represents a major step forward for NEPower in achieving its strategic goals and is a strong indication that Finnish expertise is highly trusted across Europe.

Finland's sand battery offers 10x more heat transfer efficiency, cuts energy bills by 70% The architecture of the new technology supports high vertical and horizontal scalability.

A landmark energy storage project in Eastern Finland is set to enhance grid stability and unlock greater potential for wind and solar power. Dive into the details of this pioneering initiative.

The first project, currently under construction, consists of 13 new grid scale battery energy storage systems across the south of Sweden, and is planned to add an additional 196 MW of ...
