

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Runde, Head of Battery Norway.

How big is Norway's battery market?

batteries for stationary energy storage - a market expected to reach EUR 57 billion by 2030. Now, a more mature Norwegian battery industry has greater potential to accelerate the renewable energy transition in Europe. Today Norway has not one, but two huge battery markets.

What is Battery Norway?

Battery Norway (Norwegian Battery Platform) is a national industrial collaboration platform focused on innovation and sustainable value creation opportunities, encompassing the entire battery supply chain. It will closely follow the EU's battery strategy and act as an advisor to the authorities. Battery Norway aims to help to:

Are EV batteries the future of energy storage?

"There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Runde, Head of Battery Norway. An early adopter of electric transport, Norway continues to capture EV battery headlines.

Technologically, battery capabilities have improved; logistically, the large amount of invested capital and human ingenuity during the past decade has helped to advance mining, refining, manufacturing and ...

The goal is to demonstrate to Norwegian and international commercial actors and investors the advantages of choosing Norway as a host country for new investments in the battery ...

However, across Europe, battery capacity now exceeds 20 GW, with Great Britain, Germany, and Italy leading this growth. In contrast, Norway's battery market remains ...

Norway is at the forefront of energy storage innovation, leveraging its rich hydropower heritage and cutting-edge technologies. Renowned for its extensive hydropower infrastructure, the ...

Raw Materials / Metals Norwegian Process Industry - Powered by renewable energy Many key materials needed for the green transition, including batteries, have been produced in ...

Norway is well positioned to contribute to this industry, with extensive experience in land and maritime electrification, access to renewable energy and raw materials, deep material and ...

Whether for EVs or energy storage, Norway has always had ideal conditions for battery growth: renewable

energy in the form of hydropower, strong government financial incentives for EV ...

October 21, 2025 - Elinor Batteries has been awarded the contract to supply battery solutions for three large-scale battery parks in Southern Norway, boosting energy storage capacity, reducing grid costs, ...

In terms of the production of batteries for grid support, there are significant opportunities for Dutch players. Norway's grid system, divided into zones, allows for power exchange, and ...

Why Oslo's Energy Storage Matters (And Why You Should Care) Let's face it - when you think of Oslo, fjords and Nordic winters probably come to mind before lithium batteries. But here's the ...
