

What are Octopus Energy tariffs?

Octopus Energy EV Tariffs - Smart tariffs built for electric vehicle owners, with discounted overnight charging and intelligent scheduling. Octopus Energy Export Tariffs - Get paid for electricity you export back to the grid from your solar panels or other renewable sources.

How much does Octopus Energy cost?

Octopus Energy offers a flat rate of 4.1 pence for regular SEG tariffs. There are also special tariffs, such as the Intelligent Octopus Flux. These tariffs can pay you more money during certain times, especially during peak hours. The export guarantee rate can change depending on how much electricity people want and how the supplier prices it.

How do Octopus export tariffs work?

Seamless Integration: Octopus export tariffs work harmoniously with solar panels, battery storage systems, and other renewable generation technology without requiring additional hardware. By choosing an Octopus export tariff, you're partnering with a company committed to transparency and paying consumers a fair price for exported energy.

How does Octopus Energy's SEG tariff work?

With the SEG tariff, customers earn money for the electricity they send to the grid. This payment is calculated based on kWh. Currently, the SEG rate from Octopus Energy is 4.1 pence per kWh. If you are an Octopus customer and switch your import tariff to Octopus Energy, you can access special options.
