

Our range of power solutions includes solar-based systems, hybrid energy setups, and battery-powered configurations, all engineered for long-term performance with minimal maintenance.

Several of these systems are supplied as complete units, with power distribution, connection terminals, monitoring, rectifiers and batteries in one complete cabinet.

Bureau Veritas Marine & Offshore explores battery and hybrid technology and onshore power supply in this maritime electrification report.

At Stillstrom, our mission is to reduce vessel-related greenhouse gas emissions by enabling offshore charging and ensuring that battery powered vessels have access to uninterrupted power supply ...

ABB's containerized energy storage solution is a complete, self-contained battery solution for a large-scale marine energy storage. The batteries and all control, interface, and auxiliary equipment are ...

NOVA Power Solutions provides premier power protection to your shipboard cabinet while providing the battery runtime needed to gracefully shutdown your sensitive electronic equipment in the event of a ...

Eaton 9155 Marine UPS is DNV-GL type approved, BV type approved, and ABS design assessed (up to 15 kVA). With its compact design and internal batteries, the Eaton 9155 Marine UPS is ideally suited ...

ABB's Energy storage system is a modular battery power supply developed for marine use. It is applicable to high and low voltage, AC and DC power systems, and can be combined with a variety ...

Containerized Battery Power Supply Module The power distribution of electric ships is huge, and the requirements for charging power and safety are high. Different ships have different adaptation schemes

OFFSHORE-Racks are a specific solution for a safe storage of batteries on platforms for oil production, on wind farm platforms or on ships.
