

Will a 90 MW solar farm & 360 MW battery storage project be approved?

A 90 MW solar farm and 360 MWh battery storage project proposed for northern New South Wales has secured planning approval as the state government continues to transition the electricity sector from coal and gas-fired power to renewable energy.

What is Maryvale solar project?

According to the firm in a statement, the project Maryvale, is a next-generation hybrid renewable energy project which combines a 243 MWp solar farm and a 172 MW/409 MWh battery energy storage system (BESS).

Where is Summerville solar & battery energy storage located?

The Summerville solar and battery energy storage project, being developed by Swedish company OX2 near Lismore in northern New South Wales (NSW), has received the green light from the state's Department of Planning, Housing and Infrastructure.

What is Maryville solar & energy storage system?

Maryville solar and energy storage system are going to facilitate a stable source of renewable energy by optimizing the presence of grid stability and effectiveness. The system will provide renewable energy dispatch through firming the system solar output and dispatching that between into the grid when most-needed.

Five energy infrastructure projects representing 750 MW of renewable energy generation and 524 MW/4,192 MWh of long-duration storage have been successful to the New South Wales ...

The New South Wales (NSW) Independent Planning Commission has granted approval for Ark Energy's 435MW Richmond Valley solar-plus-storage project, while Global Power Generation ...

A 90 MW solar farm and 360 MWh battery storage project proposed for northern New South Wales has secured planning approval as the state government continues to transition the ...

Octopus Australia has acquired a 1.2 GW / 4.8 GWh battery energy storage project in New South Wales and a 300 MW solar-plus-storage project in Queensland.

Our Rooftop solar and storage report, July to December 2025 shows a record 183,245 batteries were sold in Australia in the second half of 2025 alone. This figure is more than the ...

Image: ACEN Australia. Renewable energy developer Acen Australia has submitted assessment documents for its 600MW Birriwa solar-plus-storage in New South Wales (NSW), ...

The Wallaroo project, being developed by Spanish-Japanese renewable energy company Univergy Solar and Canberra-headquartered partner New Energy Development, includes a 100 MW ...

The New South Wales Land and Environment Court has turned down an appeal against the approval of the AUD-166-million (USD 116.7m/EUR 98.8m) Wallaroo solar-plus-storage park ...

Gentari breaks ground on 243 MWp Maryvale solar and battery project in NSW to power 82,000 homes and boost Australia's clean energy transition.

Accelerating its plan to directly replace retiring coal fired power plants with a reliable and strategic portfolio of renewable energy sources, Octopus Australia has acquired the Hanworth ...
