

These include 14 new projects and three amendments, featuring technologies such as wind, solar, hydro, geothermal, and battery energy storage systems (BESS). Of the 17 projects, 15 ...

UK investment firm Actis has finalised its \$600 million investment in Terra Solar Philippines Inc., securing an equity stake in a ground-breaking GW-scale solar and energy storage project.

A large-scale solar and battery energy storage project in the Philippines is moving forward faster than expected, with 54% of the first phase completed just eight months after construction began.

We stand together at the site of what will become the largest integrated solar and battery storage facility in the world - the Terra Solar Project. This landmark project will put our country on ...

The company's successful multi-project rollout addresses both regional power stability in the Visayas and the escalating national mandate for renewable energy integration.

The project planned at a cost of PHP185 billion (\$3.2 billion) is to span for 3,500 hectares in the Bulacan and Nueva Ecija provinces of the South East Asian nation. The developer claims the ...

The Board of Investments (BOI) in the Philippines has given a "green lane certificate" for a solar and storage project said to be the largest in the world, enabling it to proceed at a quicker pace.

The MTerra Solar Project, under development by Terra Solar Philippines Inc. (TSPI), a wholly owned subsidiary of SP New Energy Corp, is a 3.5 GW solar and 4.5 GWh battery energy ...

The awarded project will make a vital contribution to the Philippines' renewable energy infrastructure, particularly for the Panay sub-grid. Battery energy storage systems are essential for ...

Explore the Philippines' new solar project featuring cutting-edge battery storage systems, aimed at boosting renewable energy capacity and sustainability.
