

Should a rental property have a solar PV system?

Selected policies to reduce financial barriers are not preferred by most investors. Rooftop solar photovoltaic (PV) systems present households with a way to reduce their energy bills, while contributing to a clean energy transition. However, rental properties are considerably less likely to have solar PV.

Should property investors be paid to install solar panels?

Prior research has suggested that property investors be paid to let a third party install and manage solar panels on their rental properties (Dodd and Nelson,2022),and that policies should require tenants to purchase energy produced by solar PV systems installed by property investors (Heller,2019).

Should property investors invest in solar for rentals?

Property investor perspectives on investment in solar for rentals are examined. Surveys use best-worst scaling (BWS) and a discrete choice experiment (DCE). Property investors perceive renters are unwilling to pay higher rents for solar. Owners of apartments are more concerned about structural than financial barriers.

Do renters pay more for solar?

While the BWS finds that property investors are concerned tenants are unwilling to pay higher rents for solar PV, recent research has indicated that renters will pay more for properties with solar (Best et al.,2021).
