

Photovoltaic panels are not covered on the roof

Can solar panels be installed on a roof?

Solar panels are a popular choice for homeowners looking to reduce their carbon footprint and save on energy costs. However, installing solar panels on roofs can come with its own challenges and potential problems.

Do solar panels damage your roof?

While solar panels themselves will not inherently damage your roof, an improper installation can lead to problems down the line. It is crucial to ensure that the installation is done correctly by a professional, or with thorough research and proper planning if you choose to do it yourself.

Can a solar panel slide off a roof?

A quick slide down a bank of solar panels and off the roof is likely just as deadly as braving the smoke-filled path through the house. To remove the chances of encountering such a dilemma, there has to be a safe path from the EERO to the edge of the roof.

Are roof-mounted solar panels covered by homeowners insurance?

Most homeowners insurance policies treat roof-mounted solar panels as permanent fixtures, similar to built-in appliances or security systems. This means they typically fall under your dwelling coverage--the same protection that covers your home's structure.
