

IN AUSTRALIA The penetration of Australian rooftop photovoltaics (PV) in the energy market continues to grow and contributed roughly 15 per cent (approximately 8,172 GWh) of the National Electricity ...

4,154,426 solar panel installations have been completed across Australia from 2001 to 30 June 2025, generating a substantial 26,704,295kW of rated capacity. Australia maintains its position as the ...

OverviewProjectsInstallations by typePotentialIncentivesSupply chainRenewable energy targetsSee alsoProjects with a power rating less than 100 MW are not listed. A 20 MWp solar power plant has been built on 50 hectares of land in Royalla, a rural part of the Australian Capital Territory south of Canberra. It is powered by 83,000 solar panels, and can power 4,400 homes. It was officially opened on 3 September 2014. It is the first solar plant facility in the Australian capital, and at the time of building the l...

As of 30 September 2025, there are over 4.22 million PV installations in Australia, with a combined capacity of over 43.0 gigawatts.

See Australia's 2026 rooftop solar statistics, including national capacity, state-by-state installations, system sizes, battery attachment, exports and penetration rates. Updated with Clean ...

The sudden rise in solar PV installations in Australia since 2018 dramatically propelled the country from being considered a relative laggard to a strong leader in under two years.

The country now has 40 GW of total installed PV capacity, including 26.1 GW of distributed systems and 13.4 GW of centralised installations. More than 4 million PV systems are installed nationwide--an ...

In fact, more solar panels have been installed on rooftops of homes in this country than there are people in Australia. Here's how Australia's small scale solar energy (systems less than ...

Australia ranks fifth globally in installed solar photovoltaics (PV) capacity, trailing only China, the United States, Japan, and Germany (World Bank, 2023). This achievement underscores the nation's ...

According to Australia's Clean Energy Regulator, as at 15th January 2026, a total of 4.290 million solar power systems have been installed on Australian homes and small businesses.

In the second half of 2024 there were 159,011 rooftop PV units installed across Australia. Rooftop PV continues to be a key and growing contributor to the nation's energy mix, with a generation share of ...
