

Photovoltaic panels with warranty and without warranty

What are solar panel warranties?

Let's break down solar panel warranties, different levels of coverage and what you can expect to be protected from. Solar panel protection comes in two levels: manufacturer warranties covering product defects and energy output, including degradation, and installer warranties covering workmanship and installation quality.

How do I get a solar panel warranty?

Generally, the most robust warranties are obtained by hiring installation companies certified by the solar brands they represent. Alternatively, long warranties can also be secured from solar manufacturers that provide their own installation services. **What Is Not Covered by a Solar Panel Warranty?**

What is a solar contractor warranty?

Solar contractor warranties are essential to your solar energy system's overall protection. These warranties, provided by the installer, generally cover workmanship and installation issues. They ensure the solar panels are correctly installed, and the system operates as intended. The duration of contractor warranties can vary.

What is a solar warranty & how does it work?

When you install solar, your warranty won't take the form of a single policy, but rather several different coverages offered by your installer and the manufacturers of your solar equipment. Today, most home solar energy systems include three primary coverages: product warranties, performance guarantees, and installation warranties. 1.

Explore the essentials of solar panel warranties, including product and performance guarantees, coverage details, the pros and cons of additional warranty plans, and tips for selecting ...
