

The granted patent US12057802B2 describes a structural bracket designed for use in solar mounting systems. The bracket features a first planar portion with at least one mounting hole ...

Abstract Brackets for photovoltaic ("PV") modules are described. In one embodiment, a saddle bracket has a mounting surface to support one or more PV modules over a tube, a gusset ...

By using this service, users can see the patent family for a specific application, containing all related applications filed at participating IP Offices, along with the dossier, classification, and ...

The photovoltaic power generation unit includes a photovoltaic power generation assembly and a groove type mounting bracket of the application. By using the groove type mounting bracket of the ...

Provided in the present invention are a photovoltaic bracket and a photovoltaic power station. The photovoltaic bracket comprises a cable assembly, anchoring assemblies and a support...

In one aspect of the present disclosure, a solar module mounting bracket assembly is provided. The solar module mounting bracket assembly includes a rail configured to support a solar module ...

U.S. patent number 8,757,567 [Application Number 12/772,756] was granted by the patent office on 2014-06-24 for bracket for photovoltaic modules. This patent grant is currently ...

26. The framed photovoltaic module of claim 25, further comprising a second end plate attached to a second end of the first mounting bracket and to a second end of the second mounting ...

The invention discloses a photovoltaic bracket for a photovoltaic power station, and a mounting method thereof, and relates to the technical field of photovoltaic brackets.

10 bers are arranged to enable the photovoltaic assembly body to be clamped between the second position-limiting groove and the multiple lower connecting members.
