

CCEWOOL Ceramic Fiber Board is manufactured from high-purity aluminosilicate fibers combined with a controlled binder system, then compressed, cured, and precision-cut.

Insulation ceramic fiber boards are high performance insulation products manufactured from ceramic fiber (or with alumina fiber) and binders, with unique shot removing and vacuum forming process, ...

Ceramic fiber inorganic boards are widely used in photovoltaic solar cell drying and sintering furnaces. They offer excellent thermal insulation and have a maximum temperature resistance of up to 1400 ...

Fiberfrax alumina-silica fibers and binders. All Duraboard products offer low thermal conductivity, high temperature stability, uniform density, and excellent resistance to thermal shock and chemical attack. ...

WHAT ARE CERAMIC FIBER BOARDS? Ceramic Fiber Boards are made from aluminum silicate which thrives in high-temperature settings that need more than insulation. These boards are better than ...

Ceramic Fiber board is a rigid solution for ceramic fiber insulation. The boards are manufactured through a wet forming process using alumina-silica fibers and binders. Available board grades include: ...

These ceramic fiber boards features include high temperature stability, low thermal conductivity, consistent density, and excellent resistance against thermal shock and chemical attack. Ceramic ...

Crafted from high-purity ceramic fibers and zirconium oxide materials, these boards offer unmatched heat resistance, durability, and versatility, making them the ideal choice for extreme temperature ...

PTI Thermal Solutions provides product offerings of ceramic fiber boards, which include various dimensions, temperature ratings, and applications.

Choose from our selection of ceramic fiber boards, including over 80 products in a wide range of styles and sizes. Same and Next Day Delivery.
